

[Verse 1]

Waking up early, I Open my eyes
Turning and closing them again seems wise
Able to stay and get some more rest
Nothing's waiting - no hurry, no test

[Pre-Chorus]

Loving thoughts of you cross my mind
Though you're not here, I feel you're aligned

[Chorus]

You don't need to be here
As long as we know we're there
No need to always be around
To know and feel a special bond

[Verse 2]

Going to sleep just all by myself
Happily watching your photo on the shelf
No one around but I'm not alone
This is the best way ever known

[Bridge]

I'm yours but still mine
You're mine but still yours
All loving feelings so real and so true
Because we're free to be me and you

[Chorus]

You don't need to be here
As long as we know we're there
No need to always be around
To know and feel a special bond

[Outro]

Loving thoughts of you cross my mind
Though you're not here, I feel you're aligned
